About This Game

You are an embedded journalist travelling with a small US Army special forces team as they battle "The Soldiers of Heaven" - a religious cult in Iraq that tried to start a Muslim Armageddon during the Ashura festival.

This battle with the SOH ended with over 300 deaths : men, women and children. This project is based on a true story that was covered up... and now you have a chance to try and find the truth.

Armed with a virtual camera you will film your own version of the story as it unfolds in an immersive 3D world. In this build you can watch a preview in game.

This immersive journalism experience combines live action with 3D animation. It is being built with the Unreal 4 game engine.

What makes this experience unique, useful or innovative:

Virtual reality offers film makers an opportunity to step into their story world and get a 360 degree real time perspective of the world they are trying to bring to life. This is ideal for previsualization and production planning as the film maker can leverage the presence that VR offers and look for new shots and camera angles as they walk around their virtual set. What is missing is a virtual camera that the film maker can use to shoot.

We also think that filming in VR could be a new way to create animated films.

From the start Atom Universe it is very basic but has hope if the creators do it right! Atom Universe it pretty much a Amusement Park of the future, which is a great idea but I want to see more from this title. It has the potential to be something great and could be the new Playstation Home!?...maybe. I'm not sure but I at least hope this game goes far and starts to grow soon.. OH MY GOD I HATE THIS GAME! Now that I have that out of the way. I've never been more\u2665\u2665\u2665\u2665\u2665\u2665\u2665\u2665\u2665off to have to play a bonus chapter then this game. OK. Pros. Hackney B movie storyline. It makes sense considering the plot. Puzzles. Lots of Puzzles. Puzzles you won't find in another HOG game. Fiendishly difficult puzzles.

The cons. Glitches. Lots of emm. You clicked on that section and it closed out. If you come back you might be able to click on it again. There will be nothing there of course. You'll just waste your time thinking you missed something. The clicking on the thing basic gameplay of any of these types of games is a little wonky. So be prepared for that. Crap map. Only shows the basic areas. NOT the parts of them. Not a huge hassle but a bit annoying. Lastly. THE #@R\$@#@#\$ PUZZLES. Some of them are really good and make sense. SOME. Others? Well I hope you like randomly clicking on things with other things cause that's what your doing for half this game. Need to get rid of a wall? Welp I better use my @#%\$@#\$@#\$ Pirana on a stick to get rid of it. I couldn't make that up if I tried. It would almost be a good game if it weren't for the glitches and puzzles. Also it's not really a HOG. It more puzzles then HOG honestly. I honestly wish this was better but it's not. DO NOT BUY. If you get it for free or in a bundle, fine. But don't get this game for itself. It's not worth it.. Don't waste you money on this. I really don't know if they game is incomplete or is mean to be like this... when i installed it it send me to the page of the game "RIP - Trilogiy", i did have to clic on the download demo to be able to start the game.

A lot of black screens where you only hear weird sounds, poor graphics, my monitor was constantly attempting to adjust resolution. Could get to the first level trying to click some parts of the scenery, send me to a dark screen... go to the menu, click on clues, the game crashes.

I suppose my PC is not compatible with this game... i suppose it may work on olders machines.. i suposse the dark screen are the pre-render videos... do you want to try your luck?. best 30min of my life, i won all of my matches.. It has that old feel to it, but it doesnt feel old. If you grew up when 5gb harddrives was the bizz, or you used to play nes as a kid, then I know you're gonna like this game, because I did!

This game is fun and relaxing at the same time as it's a challenge. 10/10. A Myst type game. I haven't put very much time in to it but it seems like I might be able to. I donno if you like Myst this controls like its special needs cousin but still looks like it will be fun.. I love this game, say what you want, find another game so cheap thats runs so easily. Community and playerbase mostly russian though so havent had many good matches. Fun, runs well, cheap. Overall 8/10. Just finished my third playthrough and I still can't stop thinking about it.

Highly recommend.

Easy to mod.

The Wizards Pen is a decent little puzzle game. However, it would be more enjoyable with music in the background. It is definitely a game that I would play in small amounts. It does have a lot of content and different kinds of puzzles. I had an issue with fullscreen play and resolution being so off I couldn't see the whole screen with now way to edit that. I had to play in windowed mode which made some of my puzzles hard to play. Overall it was a nice game for casual play.. Too barebones, UI is a clunky outside of the network issues I wouldn't really recommend this for someone who just interested in the game. Tutorial lacks finesse, the text gets in your way of playing the tutorial. Seems like a mobile game not a PC game. UI Information isn't displayed well.

Based on this company's port of agricola I'd say the base of making board games and tutorials were done and they decided to quickly port two popular board games they could get the rights to.

Must like the board game to start with to overlook the issues with this board game port.. Pretty pictures. Terrible game.. Simple and a fun way to learn typing.. I always check my jackets now.. Its my favorite strategy game of all time.. This is quite a short game, but like Portal the length of the game doesn't take away from how good it is. Enjoyable and addictive, and you get some bonus levels at the end as well.
